*Note: Page numbers refer to the workbook*

## **Chapter One: Spirit Production**

### **Page 7 (Exercise 1: The Production of Distilled Spirits: Fill in the Blank/Short Answer)**

1. Ethanol/ethyl alcohol
2. Typically, a person may consume a potable form of alcohol in moderation without suffering any undesirable effects
3. Grapes, other fruit, honey, sugarcane, molasses
4. Rice, potatoes, grains, (agave)
5. 212°F (100°C)
6. 173°F (78°C)
7. They dissolve in one another
8. 96.5%

### **Page 8 (Exercise 2: The Production of Distilled Spirits: Matching)**

- |                 |                |
|-----------------|----------------|
| 1. Wash         | 7. Proof       |
| 2. Dehydration  | 8. Heart       |
| 3. Congeners    | 9. Lees        |
| 4. Vaporization | 10. Tails      |
| 5. Tails        | 11. Heads      |
| 6. Heads        | 12. Cut Points |

### **Page 9 (Exercise 3: The Pot Still Diagram)**

- |                   |                    |
|-------------------|--------------------|
| 1. Water source   | 5. Wash inlet      |
| 2. Worm condenser | 6. Still head      |
| 3. Cooling water  | 7. Copper pot      |
| 4. Swan's neck    | 8. Collecting safe |

### **Page 10 (Exercise 4: Types of Stills: Matching)**

- |                 |                           |
|-----------------|---------------------------|
| 1. Pot still    | 8. Hydroselector          |
| 2. Brouillis    | 9. Rectifier              |
| 3. Low wines    | 10. Hybrid still          |
| 4. Reflux       | 11. Downcomer             |
| 5. Patent still | 12. Aeneas Coffey         |
| 6. Analyzer     | 13. Multiple Column Still |
| 7. Robert Stein | 14. Lyne Arm              |

### **Page 11 (Exercise 5: The Column Still Diagram)**

1. High alcohol product take-off
2. Condenser
3. 50% abv product take-off
4. 10% abv product take-off
5. Boiler
6. Liquid return
7. Wash feed
8. Analyzer-rectifying section
9. Analyzer-stripping section
10. Reflux tube

**Page 12 (Exercise 6: The Hybrid Still Diagram)**

1. Condenser
2. Alcohol/water vapor
3. Column still
4. Pot still
5. Heat source
6. Liquid return
7. Reflux
8. Product take-off

**Page 13 (Exercise 7: The Maturation of Distilled Spirits: Fill in the Blank/Short Answer)**

1. New make spirit
2. Clear, or water-white
3. Blending, coloring, filtration, adding water to reduce abv, aging
4. a. Lignin  
b. Hemicellulose  
c. Cellulose  
d. Hemicellulose  
e. Cellulose  
f. Lignin
5. Vanilla
6. a. Filtration  
b. Coloration  
c. Oxidation, Evaporation, & Concentration  
d. Extraction  
e. Evaporation

**Page 14 (Exercise 8: Spirit Categories: Matching)**

1. Vermouth
2. Gin
3. Mirabelle
4. Whiskey
5. Tequila
6. Rum
7. Amari
8. Vodka
9. Akvavit
10. Brandy
11. Liqueurs
12. Mezcal
13. Cachaça
14. Pomace Brandy

**Page 15 (Checkpoint Quiz: Chapter 1)**

1. C
2. B
3. A
4. C
5. C
6. D
7. A
8. D
9. C
10. B
11. B
12. B
13. A
14. D
15. B

**Chapter Two: The Sensory Evaluation of Spirits**

**Page 17 (Exercise 1: The Sensory Evaluation of Spirits: True or False)**

1. False
2. True
3. True
4. False
5. False
6. True
7. True
8. True
9. False

**Page 18 (Exercise 2: The Sensory Evaluation of Spirits: Matching)**

- |               |               |
|---------------|---------------|
| 1. Length     | 7. Complexity |
| 2. Bitterness | 8. Acidity    |
| 3. Sweetness  | 9. Alcohol    |
| 4. Louching   | 10. Finish    |
| 5. Rancio     | 11. Viscosity |
| 6. Meniscus   | 12. Turbidity |

**Page 19 (Exercise 3: The Sensory Evaluation of Spirits: Fill in the Blank)**

1. Flights, six, eight
2. Tears or legs (sometimes the term “rivulets” is also used); alcohol
3. Intense
4. Medium intensity, light
5. Roll
6. Alcoholic
7. Cleanse
8. Texture, weight, viscosity
9. Sweetness
10. Complex
11. Hot, harsh

**Page 20 (Checkpoint Quiz: Chapter 2)**

- |      |      |
|------|------|
| 1. D | 5. B |
| 2. B | 6. D |
| 3. A | 7. C |
| 4. C | 8. A |

## **Chapter Three: Vodka and Other Neutral Spirits**

**Page 21 (Exercise 1: Definition and History of Vodka: Matching)**

1. Carbon
2. 80°
3. 60°
4. 75°
5. Grain
6. Neutral spirits
7. Grapes
8. Smirnoff
9. Potato
10. Stolichnaya
11. Original vodka

**Page 22 (Exercise 2: The Production of Vodka: True or False)**

- |          |           |
|----------|-----------|
| 1. True  | 9. True   |
| 2. False | 10. True  |
| 3. False | 11. False |
| 4. False | 12. True  |
| 5. True  | 13. True  |
| 6. False | 14. True  |
| 7. True  | 15. True  |
| 8. False |           |

**Page 23 (Exercise 3: Vodka by Region: Matching)**

- |                    |                   |
|--------------------|-------------------|
| 1. Poland          | 11. France        |
| 2. France          | 12. Poland        |
| 3. United States   | 13. United States |
| 4. The Netherlands | 14. Poland        |
| 5. Sweden          | 15. Poland        |
| 6. United States   | 16. United States |
| 7. Russia          | 17. Poland        |
| 8. Poland          | 18. Russia        |
| 9. Canada          | 19. Iceland       |
| 10. Austria        | 20. Finland       |

**Page 24 (Exercise 4: Flavored Vodka/Fill in the Blank/Short Answer)**

1. Starka
2. Krupnik; warm (hot, heated); Krupnikas
3. Zubrówka; Belarus
4. Pertsovka; honey
5. Whiskey
6. Okhotnichya; ginger
7. Tormentil
8. 30%
9. Light (low-calorie)
10. 37.5% (the same as original vodka)

**Page 25 (Exercise 5: Vodka and Neutral Spirits: Fill in the Blank/Short Answer)**

<b>Barley</b>	Traditional base ingredient used for vodka production in Finland
<b>Ethyl alcohol (ethanol)</b>	The flavor of American vodka is often compared to the flavor of this substance
<b>Rye, Potato</b>	Traditional base ingredients used for vodka production in Poland
<b>Everclear</b>	American neutral spirit – sometimes bottled as high as 190 proof – produced by the Luxco company
<b>Wheat, barley</b>	Base materials that tend to produce vodka that is highly acidic and lighter in body
<b>Wheat</b>	Traditional base ingredient used for vodka production in Russia
<b>Corn</b>	Base material that tends to produce vodka that is delicate in flavor and texture
<b>Waxy</b>	Flavor/texture characteristic found in some brands of vodka due to the presence of ethyl myristate and ethyl palmitate
<b>Spirytus Rektyfikowany</b>	Brand of rectified spirit from Poland, often used to make homemade liqueurs (or for consumption)
<b>Rye, rye blends</b>	Base materials that tend to produce vodka that is spicy and more robust in character
<b>Primaspirit</b>	Brand of neutral grain spirit produced in Germany, mostly for use in homemade liqueurs

<b>Potato</b>	Base material that tends to produce vodka that is full-bodied and creamier on the palate
<b>Winter Wheat</b>	Traditional base ingredient used for vodka production in Sweden
<b>Fruity, floral</b>	Aromas found in some brands of vodka due to the presence of ethyl laureate

**Page 26 (Exercise 6: Baijiu, Shōchū, and Soju: Matching)**

- |                |                     |
|----------------|---------------------|
| 1. Kōji        | 9. Shaojiu          |
| 2. Korea       | 10. Japan           |
| 3. Soba shōchū | 11. Jinro           |
| 4. Erguotou    | 12. Moutai          |
| 5. Komejōchū   | 13. Imojōchū        |
| 6. Wuliangye   | 14. Qu              |
| 7. China       | 15. Moromi          |
| 8. Mugijōchū   | 16. Kasutori shōchū |

**Page 27 (Checkpoint Quiz: Chapter 3)**

- |      |       |
|------|-------|
| 1. C | 7. C  |
| 2. B | 8. B  |
| 3. A | 9. A  |
| 4. D | 10. A |
| 5. A | 11. C |
| 6. D | 12. D |

## Chapter Four: Gin and Other Flavored Spirits

**Page 29 (Exercise 1: The Definition of Gin: True or False)**

- |          |          |
|----------|----------|
| 1. False | 6. True  |
| 2. True  | 7. False |
| 3. True  | 8. True  |
| 4. False | 9. False |
| 5. True  | 10. True |

**Page 30 (Exercise 2: Botanicals: Matching)**

1. Coriander Seed
2. Cardamom
3. Orrisroot
4. Gentian
5. Quinine
6. Calamus
7. Coriander Seed
8. Juniper
9. Calamus
10. Hyssop
11. Angelica
12. Cassia

**Page 31 (Exercise 3: Methods of Gin Production: Comparison)**

	Statement	Original Distillation	Re-distillation	Cold Compounding	Essential Oils
1.	Uses fermented mash	X			
2.	Uses neutral spirits and botanicals enclosed in a mesh bag			X	
3.	When done in altered air pressure, may be referred to as "vacuum distillation"		X		
4.	Produces a style of gin considered to be lower quality than distilled gin			X	X
5.	Also known as the compounding essence procedure				X
6.	Uses a specialized still with a gin head	X	X		
7.	Involves "soaking" neutral spirits with a batch of crushed botanicals			X	
8.	Also known as "direct distillation"	X			
9.	Produces a style of gin known as "compound gin"			X	X
10.	Uses neutral spirits		X	X	X

**Page 32 (Exercise 4: Styles of Gin: Fill in the Blank/Short Answer)**

- |                          |                             |
|--------------------------|-----------------------------|
| 1. Water                 | 8. Mayflower                |
| 2. 0.1 gram              | 9. England (Witham), Oregon |
| 3. Light, dry, and crisp | 10. Old Tom gin             |
| 4. 1793                  | 11. Dudley Bradstreet       |
| 5. Black Friars          | 12. Carter head             |
| 6. Vilnius gin           | 13. 30%                     |
| 7. Dry Martini           | 14. Menorca                 |

**Page 33 (Exercise 5: Juniper-flavored Spirit Drinks)**

- |                |                  |
|----------------|------------------|
| 1. Wacholder   | 8. Germany       |
| 2. Belgium     | 9. Steinhäger    |
| 3. Holland Gin | 10. Wacholder    |
| 4. Oude        | 11. Germany      |
| 5. Genever     | 12. Jonge        |
| 6. France      | 13. Koptstootjes |
| 7. Steinhäger  | 14. Wacholder    |

**Page 34 (Exercise 6: Flavored Spirits: Fill in the Blank/Short Answer)**

<b>Couvet, Switzerland</b>	Location of first absinthe distillery
<b>Thujone</b>	Chemical compound often blamed for certain (alleged) harmful effects of the consumption of absinthe
<b>2007</b>	Year that absinthe became legal in the United States (after a ninety-year ban)
<b>Turkey</b>	Country of origin for the unsweetened anise-flavored spirit known as Raki
<b>Sultana grapes</b>	Base material which is fermented and used in the production of high-quality Raki
<b>Suma</b>	The base spirit that will be redistilled and made into raki
<b>Pernod</b>	Product launched in 1928 as a sweeter alternative to absinthe, “minus the wormwood”
<b>Pastis</b>	Dry, anise-flavored spirit launched by Paul Ricard in the 1930s
<b>Ouzo</b>	The leading anise-flavored spirit in Greece
<b>Pacharán</b>	Sloe berry-flavored liqueur made with anise-flavored spirits, popular in Spain’s Basque Country
<b>Caraway</b>	Main flavoring in akvavit
<b>Taffel Akvavit</b>	Term used to indicate a clear, unaged (or just slightly aged) style of akvavit
<b>Linje Akvavit</b>	Style of akvavit that is aged based on a unique tradition of sailing ships
<b>Sweden</b>	Country that has PGI status for akvavit

**Page 35 (Checkpoint Quiz: Chapter 4)**

- |      |       |
|------|-------|
| 1. C | 7. A  |
| 2. B | 8. B  |
| 3. B | 9. A  |
| 4. A | 10. C |
| 5. D | 11. A |
| 6. B | 12. B |

**Chapter Five: Whiskey**

**Page 37 (Exercise 1: The Definition of Whiskey: True or False)**

- |          |           |
|----------|-----------|
| 1. True  | 7. False  |
| 2. True  | 8. True   |
| 3. False | 9. False  |
| 4. False | 10. True  |
| 5. True  | 11. False |
| 6. True  | 12. True  |

**Page 38 (Exercise 2: Whiskey Production—Fermentation and Distillation: Matching)**

- |                              |                 |
|------------------------------|-----------------|
| 1. Mash tun                  | 9. Sodium       |
| 2. Kilning                   | 10. Malting     |
| 3. Wort                      | 11. Grist       |
| 4. Fermentation              | 12. Wash        |
| 5. Mashing                   | 13. Green malt  |
| 6. Maltose                   | 14. Mash cooker |
| 7. Iron                      | 15. Kilning     |
| 8. Grain bill (or mash bill) |                 |

**Page 39 (Exercise 3: Whiskey: Timeline)**

1.	Grain Bill
2.	Malting
3.	Green malt
4.	Kilning
5.	Milling
6.	Mashing
7.	Washing
8.	Fermentation
9.	Distillation in a wash still
10.	Low wines
11.	Distillation in a spirit still
12.	New make spirit
13.	Maturation
14.	Blending
15.	Bottling

**Page 40 (Exercise 4: Whiskey Production—Maturation and Bottling: True or False)**

- |          |           |
|----------|-----------|
| 1. True  | 9. True   |
| 2. False | 10. True  |
| 3. True  | 11. True  |
| 4. True  | 12. False |
| 5. False | 13. False |
| 6. True  | 14. True  |
| 7. True  | 15. False |
| 8. False |           |

**Page 41 (Exercise 5: Scotch Whisky: Matching)**

- |                        |                         |
|------------------------|-------------------------|
| 1. Blended malt Scotch | 9. Blended grain Scotch |
| 2. Malted barley       | 10. Blended Scotch      |
| 3. Blended Scotch      | 11. Single malt Scotch  |
| 4. Single malt Scotch  | 12. Islay               |
| 5. The Highlands       | 13. The Lowlands        |
| 6. Speyside            | 14. Speyside            |
| 7. Single grain Scotch | 15. Campbeltown         |
| 8. Wheat               |                         |

**Page 42 (Exercise 6: Whisky-Producing Regions of Scotland: Map Exercise)**

- |                       |                       |
|-----------------------|-----------------------|
| 1. Isle of Skye       | 10. Edinburgh         |
| 2. Northern Highlands | 11. Glasgow           |
| 3. Orkney Islands     | 12. Lowlands          |
| 4. Inverness          | 13. Isle of Arran     |
| 5. Speyside           | 14. Campbeltown       |
| 6. Eastern Highlands  | 15. Islay             |
| 7. Aberdeen           | 16. Western Highlands |
| 8. Central Highlands  | 17. Isle of Mull      |
| 9. Perth              |                       |

**Page 43 (Exercise 7: Irish Whiskey: Comparison)**

	Statement	Irish Malt Whiskey	Irish Grain Whiskey	Irish Pot Still Whiskey	Blended Irish Whiskey
1.	Must be distilled using pot stills	X		X	X (partially)
2.	Must be bottled in Ireland or shipped off the island in inert bulk containers	X	X	X	X
3.	May be produced using double or triple distillation	X		X	X (potentially)
4.	Must be made using 100% malted barley	X			
5.	Must be produced using a maximum of 30% malted barley		X		
6.	Must be produced using a minimum of 30% of both malted and unmalted barley			X	
7.	Often contains up to 5% oats or rye			X	
8.	Not allowed to be exported in any type of wooden container	X	X	X	X
9.	Produced using two or more different whiskey types				X
10.	Must be stored in wooden casks not to exceed 700 liters in capacity for at least 3 years	X	X	X	X
11.	Produced using a mixture of malted and unmalted grains		X	X	X

**Page 44 (Exercise 8: European Whiskey: True or False)**

- |          |           |
|----------|-----------|
| 1. True  | 9. True   |
| 2. True  | 10. True  |
| 3. False | 11. False |
| 4. True  | 12. False |
| 5. True  | 13. True  |
| 6. False | 14. True  |
| 7. True  | 15. False |
| 8. False |           |

**Page 45 (Exercise 9: Bourbon Whiskey: Fill in the Blank/Short Answer)**

- |                          |                              |
|--------------------------|------------------------------|
| 1. Corn, 70%             | 7. 1964, distinctive         |
| 2. 160                   | 8. Honey barrels             |
| 3. Backset, sour mashing | 9. Blended (or a blend), 51% |
| 4. Beer stills, doubler  | 10. Kentucky                 |
| 5. Tails                 | 11. Straight bourbon         |
| 6. 125 proof, charred    |                              |

**Page 46 (Exercise 10: American Whiskey: Fill in the Blank/Short Answer)**

The Lincoln Country Process	Tennessee whiskey must undergo this charcoal-filtering process
Benjamin Prichard's	Tennessee distillery that was granted exception to the charcoal-filtering rule
Old Overholt	Brand of American rye whiskey founded in 1810
No aging is required, but if it is aged, it must be in used or uncharred barrels	Aging requirement for American corn whiskey
Bourbon Rye Wheat Malted barley Malted rye Corn	The six possible types of American straight whiskeys
Two years in new charred oak barrels	Minimum aging requirement for American straight whiskeys that have an age statement on the label
Four years in new charred oak barrels	Minimum aging requirement for American straight whiskeys that do not have an age statement on the label
100 proof	Required bottling proof for American bottled-in-bond whiskey
Spirit whiskey	A mixture of neutral spirits mixed with no less than 5% whiskey
White dog, new make, or unaged whiskey	Another term for "Jacob's Ghost" or other types of "white whiskey"
Light whiskey	Obscure whiskey product that must be distilled to higher than 160 proof but lower than 190 proof

**Page 47 (Exercise 11: Canadian Whisky: True or False)**

- |          |           |
|----------|-----------|
| 1. False | 9. True   |
| 2. True  | 10. True  |
| 3. True  | 11. False |
| 4. False | 12. True  |
| 5. True  | 13. False |
| 6. False | 14. True  |
| 7. False | 15. True  |
| 8. False |           |

**Page 48 (Exercise 12: International Whiskies: Matching)**

- |                          |                          |
|--------------------------|--------------------------|
| 1. Yoichi Distillery     | 8. Brilliance            |
| 2. Amrut Distilleries    | 9. Miyagikyo             |
| 3. Pradlo Distillery     | 10. Feni                 |
| 4. Tasmania Distillery   | 11. Hazelburn Distillery |

| 5. Grande Champagne | 11. City of Cognac   |
| 6. Petite Champagne | 12. City of Bordeaux |

### Page 56 (Exercise 4: Cognac Labeling Terms: Fill in the Blank/Short Answer)

<b>Eau-de-vie de Cognac or Eau-de-vie des Charentes</b>	The full, official name of cognac
<b>Fine Champagne</b>	Labeling term used to indicate a cognac produced with a combination of grapes from the Grande Champagne and Petite Champagne areas (with at least 50% from Grande Champagne)
<b>*** (three stars) VS (Very Special)</b>	Labeling terms used for cognac with a minimum of two years of wood aging
<b>Supérieur</b>	Labeling term used for cognac with a minimum of three years of wood aging
<b>VSOP (Very Superior Old Pale) Réserve</b>	Labeling terms used for cognac with a minimum of four years of wood aging
<b>VVSOP Grande Réserve</b>	Labeling terms used for cognac with a minimum of five years of wood aging
<b>Napoléon Extra Vielle Réserve Hors d'Âge</b>	Labeling terms used for cognac with a minimum of six years of wood aging
<b>XO (Extra-Old)*</b>	Labeling term used for a cognac with a minimum of ten

	XO (Extra-Old)* (see note) years of wood aging
<b>Hors d'Âge</b>	Labeling term that translates as "beyond age"
<b>Bureau National Interprofessionnel du Cognac (BNIC)</b>	Agency that oversees the inventory and age control of cognac
<b>Acquit Régional Jaune d'Or</b>	French term for the "golden certificate" which must accompany every consignment of cognac
*Note: The XO designation was changed to reflect the ten-year minimum (from the previous standard of six years minimum) as of April, 2018.	

**Page 57 (Exercise 5 Armagnac: Matching)**

- |                          |                   |
|--------------------------|-------------------|
| 1. Vintage               | 9. Ugni Blanc     |
| 2. Clairette de Gascogne | 10. Colombard     |
| 3. Monlezun              | 11. Bas-Armagnac  |
| 4. Boulbènes             | 12. Baco Blanc    |
| 5. Blanche               | 13. Haut-Armagnac |
| 6. Mauzac                | 14. Folle Blanche |
| 7. Floc de Gascogne      |                   |
| 8. Monlezun              |                   |

**Page 58 (Exercise 6: The Armagnac Region: Map Exercise)**

|------------------|-------------|
| 1. Bas-Armagnac  | 6. Condom   |
| 2. Ténarèze      | 7. Toulouse |
| 3. Haut-Armagnac | 8. Auch     |
| 4. Cazaubon      | 9. Mirande  |
| 5. Eauze         |             |

**Page 59 (Exercise 7: Brandy de Jerez: Fill in the Blank/Short Answer)**

<b>La Mancha</b>	Area where most of the grapes for Brandy de Jerez are grown
<b>Airén</b>	Variety that provides 95% of the grapes for Brandy de Jerez
<b>Palomino</b>	Variety that provides 5% of the grapes for Brandy de Jerez
<b>Jerez de la Frontera Sanlúcar de Barrameda El Puerto de Santa María</b>	The three towns that make up the "Sherry Triangle" – where the Brandy de Jerez DO is located
<b>Holandas</b>	Base spirit that is up to 70% abv
<b>Aguardiente</b>	Base spirit that is up to 80% abv
<b>Destilado</b>	Base spirit that has up to 94.8% abv
<b>Alquitaras</b>	Specialized stills used to produce high-quality Brandy de Jerez
<b>Solera System</b>	Series of barrels used for aging Brandy de Jerez
<b>Solera</b>	Labeling term used for Brandy de Jerez that has a minimum of 6 months of solera aging in wood
<b>Solera Reserva</b>	Labeling term used for Brandy de Jerez that has a minimum of 1 year of solera aging in wood
<b>Solera Gran Reserva</b>	Labeling term used for 100% <i>holandas</i> Brandy de Jerez that has a minimum of 3 years of solera aging in wood

| 4. Mexico City | 9. Michoacán   |
| 5. Oaxaca      |                |

**Page 76 (Exercise 4: Tequila-Producing Regions: Comparison)**

	Statement	The Amatitán/ Lowlands Region	Los Altos/ The Highlands Region
1.	Overall, the warmer of the two regions	X	
2.	Average altitude is 2,000 meters (6,500 feet) above sea level		X
3.	Produces tequila that are more vegetal in flavor	X	
4.	Produces tequila with spicy, black pepper flavors	X	
5.	Located in the east-central section of Jalisco	X	
6.	Produces tequilas that are highly floral in nature		X
7.	Produces agave piñas that average 35 to 75 kilos (75 to 165 pounds) in weight	X	
8.	Produces tequilas that are crisper and more earthy	X	
9.	Produces agave piñas that average 50 to 90 kilos (110 to 200 pounds) in weight		X
10.	Average altitude is 1,300 meters (4,200 feet) above sea level	X	
11.	Produces tequilas that are softer and fruitier		X
12.	Located in the north-central section of Jalisco		X

**Page 77 (Exercise 5: Bottling and Labeling Tequila: Fill in the Blank/Short Answer)**

1. Plata, white, and silver
2. 51; cane sugar, molasses, or corn syrup
3. Sixty
4. Oro (gold)
5. Mixto (non-100% agave); joven abocado
6. Reposado
7. Añejo
8. Extra-añejo
9. 600 liters (160 gallons)
10. 2004
11. 100% agave; mixto (non-100% agave)
12. Jose Cuervo

**Page 78 (Exercise 6: Other Agave-Based Beverages: Matching)**

| 6. False |           |

**Page 94 (Exercise 2: Modern Mixology and Craft Cocktails)**

<b>Calibogus</b>	A pre-prohibition cocktail made with rum, spruce beer, and molasses
<b>Muddler</b>	A special bar tool used to crush ingredients such as mint leaves or lime wedges in order to squeeze out juices, oils, and flavors
<b>Shrub</b>	A beverage made in colonial America using the liquid from a batch of fruit macerated with sugar and vinegar
<b>Free-pour</b>	To make and mix drinks without using any kind of measuring device or measured pour spout
<b>Specific gravity</b>	Measurement of the weight of a liquid in reference to water
<b>Twist</b>	The peel of a citrus fruit specially cut to be used as a drink garnish
<b>Bounce</b>	A drink popular in colonial America often made (as the legend goes) by Martha Washington using cherries, spices, and a bottle of rye whiskey
<b>Neat</b>	Term often used to describe a shot of liquor poured directly into the glass
<b>Crusta</b>	A classic cocktail originally prepared with cognac, orange liqueur, bitters, and lemon juice; garnished with a long loop of lemon peel and a sugared rim
<b>Up</b>	Term used to describe a drink that is shaken or stirred with ice to chill, then strained into the glass and served without ice
<b>Cobbler</b>	Vintage cocktails made with a base spirit or wine, sugar and fruit shaken with ice and poured, unstrained into a glass; original version made with Sherry
<b>Float</b>	Term used for the last (lightest) ingredient to be poured in a layered drink
<b>Silver Fizz</b>	A classic cocktail made with gin (or another spirit), lemon juice, and sugar; shaken with an egg white and served tall over ice with carbonated water
<b>Back (or chaser)</b>	Modern term used for a nonalcoholic drink served alongside a shot or a strong drink
